

Dear New Member,

We are so glad you contacted UFAN'S Division of Eosinophilic Support (DOES). We are a support group for patients and families that have been diagnosed with an eosinophilic gastrointestinal disorder, have severe allergies, restricted diets, or need feeding tube support.

Our group is quite diverse, serving both pediatric and adult patients. While some members are newly diagnosed, others are familiar with their disorder. We offer education, support, and activities for all members.

Our meetings are on the last Tuesday, 7:00 p.m. of every other month. Our first meeting of the year will be in January and our last meeting is in November. We meet in the Doly Education building of the Intermountain Medical Center located at 5121 S. Cottonwood St. In Murray, Utah.

Because this group is a division of the Utah Food Allergy Network, we would suggest you go onto our website to find up-to-date news and events.

Please do not hesitate to contact us if there is anything we can do to help support you and your family.
